DETAILED ACTION***Election of Species***

1. This application contains claims directed to the following patentably distinct species:

- (1) Species belonging to thickener which is a polyether of a copolymer of
 - (a) PEG-180
 - (b) Doxinol-5
 - (c) PEG-25
 - (d) Tristiryphenol
 - (e) Tetrametoxymethylglycouryl monomers as recited in claim 5 and
 - (f) polyether-1 which represents the structural formula :

R = hydrophobic methyl branch

wherein n is greater than 1, preferably n could range in a way such that its final molecular is between 30,000 to 40,000.

Art Unit: 1618

If applicant elect species (f), a specific name and structure of the polymer should be disclosed.

- (2) A cationic polymer
- (a) Polymer JR 125
 - (b) Polymer JR 400
 - (c) Polymer JR 30M
 - (d) Polymer LR 400
 - (e) Polymer LR 30M
 - (f) Polymer LK
 - (g) Poliquaternium – 10

Art Unit: 1618

If the applicant elect species (g), a specific name and structure of the cationic polymer should be disclosed.

- (3) Silicones
 - (a) Dimethiconol
 - (b) Cyclometicone
 - (c) Amodimethicone

The species are independent or distinct because, there is no common core structure. Additionally art anticipation or rendering obvious on species will not anticipate or render obvious to species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 1618

the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not, distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Due to complexity of the restriction requirement, telephone call was not made to applicants.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1618

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
